*United in Excellence*™

**online-registries (OLR)** is a digital medical records company providing safe, secure, simple, private, portable and affordable storage and retrieval of vital personal medical information with the ability to access and share that information with designated healthcare providers in an emergency, when every second counts.

**OLR** permits access to personal and medical information for individuals and their families. The information is controlled only by the subscriber. Access by other third parties (caregivers, babysitters, school nurses, camp medical personnel etc.) are authorized by the member alone.

The **OLR** websites also serve as an extremely useful organizational tool for basic family health information that you need at your fingertips.

## *med proxy*

offers members the security of knowing that their wishes will be respected even if they are incapacitated and unable to participate in treatment decisions.

## *med records*

presents a comprehensive system of medical record management making critical information, including family histories, blood type, contact and insurance information available to those who need to know.

*Peace of mind-online* ®

## *kid records*

helps members protect their children against medical error. Parents can document a child's medical information - allergies, illnesses, medications and any special needs.

## *senior records*

gives its members a safe, simple, secure and affordable way to organize their medications and to identify health care providers, including in home services.
